ABOUT ME

I am currently searching for a new opportunity to use, enhance, challenge and broaden my skillset, and to positively contribute to a software development team.

I'm a Full Stack Software Developer with a background in Electrical Engineering. After completing BrainStations' Web Development program, I pursued a career as a Web/Software Developer. Since I began this career path, I've gained considerable real-world software developing experience, with tools such as JavaScript, React, HTML/CSS, NODE, Python and more. I have also worked with several PSQL databases, accessing different deployment environments on the cloud using Unix and I'm actively learning new skills, languages and frameworks. I've also gained considerable Dev-Ops experience. From version control using GIT, ticket distribution systems such as Jira, and experience using tools such as Jenkins and Azure, I'm well versed in the world of Dev-Ops and well-rounded enough to be a part of practically any software team!

EXPERIENCE

Software Application Developer | i-Sight Software

APR 2021 – JAN 2023 (REMOTE)

- Responsible for maintenance, alterations, bug fixes and more in several configurations of web application at the request of customers
- Attended daily meetings within a development team and sometimes with customers to fix issues and design new features according to their requirements
- Used several programming frameworks such as JavaScript, Node JS to modify web applications, and PSQL frequently to access and modify several databases
- Used DevOps tools such as Git for version control and Jira ticketing system
- Deployed updates to applications using Unix command line in cloud environments such as Jenkins, Rogers, Azure and AWS
- Tested new features/additions in UAT environments then deployed to production to be used by customers
- Assisted in the delivery of customized i-Sight software to important customers such as Nasa, Twitter etc. and several colleges and medical institutions in North America

Sales Associate | Virgin Mobile

JUN 2019 - AUG 2020, OTTAWA, ON

- Consulted with customers to find the right personal mobile device for their needs
- Demonstrated product and technology knowledge by researching devices and services in order to better sell the equipment
- Responsible for activating consumer devices on Virgin's (Bell Canada's) wireless network in both an in-store and remote environment
- Provided online sales and wireless support in a remote setting during store shutdowns due to pandemic

Installer/Assistant | Fluent Home

MAY 2017- AUG 2018, CALGARY, AB

- Responsible for assisting with the installation of security cameras in residential homes and businesses within and outside the city of Calgary
- Assisted with wiring and configuration of security systems
- Assisted in business record keeping and organization by creating spreadsheets
- Acquired and delivered several pieces of security equipment across the city of Calgary
- Responsible for troubleshooting security equipment around the city

EDUCATION

BrainStation | Diploma Candidate, Web Development

SEP - DEC 2020, ONTARIO, CA

- Learned web software creation and design
- Created a scheduling app for fitness activities as a final Capstone project

University of Ottawa | Bachelor of Applied Science, Electrical Engineering

SEP 2014 - 2019, OTTAWA, ON

- Specialized in Wireless Communication Systems
- Designed and built a mock home security system as part of final Capstone project

SKILLS

- Hardworking team player with problem-solving skills
- Attention to detail
- Can deliver projects promptly in a team environment
- Several software languages/frameworks:
 - HTML5, CSS/SCSS, JavaScript, React.js, Python, Web APIs, User Authentication, Node.js, Python, GitHub, Jira, etc.
- Microsoft Office (Word, Excel, PowerPoint etc.)
- Experience with sales and customer service in a professional environment

PROJECTS

- Ultimate Scheduler: A scheduling app that allows the user to select from a list of Cardio activities for each day of the week
- www.johnogbonna.com: A portfolio website I created to experiment with UI design and website making. Fully responsive design with custom made UI
- Random Number Generator! A web app that produces a list of random numbers within parameters set by the user: <https://randomnumbers-445bc.web.app/>
- Katie Krukoff portfolio: <https://www.katiekrukoff.xyz> : A simple front portfolio project I created to help the amazing Katie Krukoff in her professional and recreational affairs!
- Crunchee Munchies: Ever heard of a Nigerian snack called chin-chin? Well, my mom makes the best one! I'm creating this fully responsible web app to let customer select their order of chin-chin and send us an email containing their request!
- More coming soon!
